

- FileMaker

File Conversion Solution

MOSAIC Software

FileMaker has been designed to eliminate the time consuming task of manually entering data into *TeleBank Business or other Banking Payment Software. For example, when you run a payroll and then manually transfer the list of payments into the BACS module of the Banking Payment Software, **FileMaker** will automatically import files from your application and convert them into a format accepted by the Bank. **FileMaker** is easy to install and is supplied on CD-ROM with an installation utility. **FileMaker** comes with templates for the most popular payroll and supplies ledger programs including Sage and Pegasus.

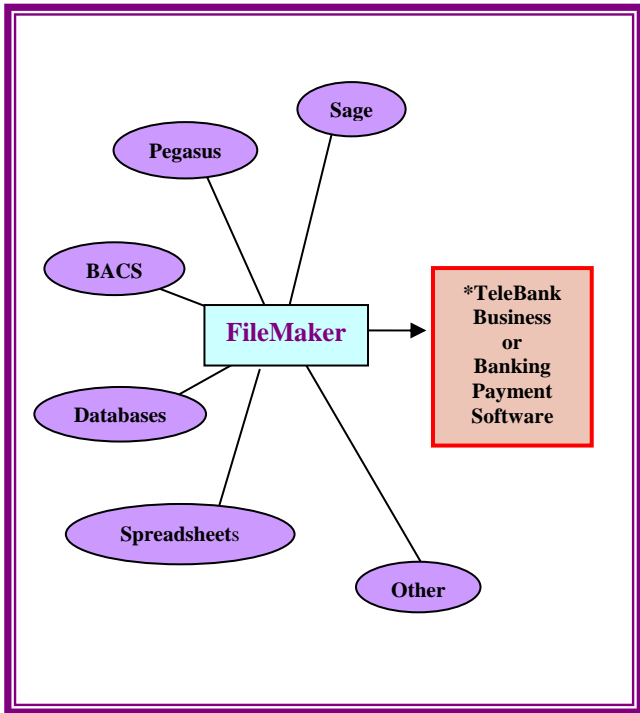

However, if the template required is not included, we will design one to interface to your existing application. If your application is not shown in our diagram, **FileMaker** should still be able to convert your files into a format ready for input to *TeleBank Business or other Banking Payment Software. Please contact Mosaic Software for further information.

"FileMaker is easy to install and is supplied on CD Rom with an installation utility"

To order **FileMaker**

Please complete the boxes below and return the form (no stamp required) with your payment to:-

Freepost RLXS - ZRLR - URXU
